

KatzeMatcha

KatzeMatcha is a smartphone app that indicates to people that travel with cats locations that offer safe food for cats alongside their owners.

Are you a fellow cat owner that likes to bring your cat on adventures with you? Do you struggle finding restaurants and cafes that allow you to bring your cat inside and eat alongside you? Then this app is for you! Never worry about offending another eatery again with this handy app that scans your location for cat-approved places to eat and drink, for the both of you.

App will use the user's location to scan for cat-approved eateries. Locations are approved by the places themselves, and confirmed with user reviews.

Whimsical
Cozy
Maximalist
Accessible
Sophisticated
